DEFINITIONS

Command Staff – in an incident management organization, the Command Staff consists of the Incident Commander and the special staff positions of Public Information Officer, Safety Officer, Liaison Officer, and other positions as required, who report directly to the Incident Commander.

Disaster Service Worker – includes public employees and any unregistered person impressed into service during a State of War Emergency, a State of Emergency, or a Local Emergency by a person having authority to command the aid of citizens in the execution of his or her duties.

Emergency – a condition of disaster or of extreme peril to the safety of persons and property caused by such conditions as air pollution, fire, flood, hazardous material incident, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, the Governor's warning of an earthquake or volcanic prediction, or an earthquake or other conditions, other than conditions resulting from a labor controversy.

Emergency Operations Center (EOC) – a location from which centralized emergency management can be performed. It is the physical location at which the coordination of information and resources to support domestic incident management activities will normally take place. EOC facilities are found at the local government, operational area, region, and state levels in SEMS. An EOC may be a temporary facility or may be located in a more central or permanently established facility, perhaps at a higher level of organization with a jurisdiction. EOCs may be organized by major functional disciplines (e.g., fire, law enforcement, and medical services), by jurisdiction (e.g., federal, state, regional, county, city, tribal), or some combination thereof.

General Staff – a group of incident management personnel organized according to function and reporting to the Incident Commander. The General Staff normally consists of the Operations Section Chief; Planning and Intelligence Section Chief; Logistics Section Chief; and Finance and Administration Section Chief

Incident – an occurrence or event, either human-caused or by natural phenomena, which requires action by emergency response personnel to prevent or minimize loss of life or damage to property and/or natural resources. Incidents may, for example, include major disasters, emergencies, terrorist attacks, terrorist threats, wild-land and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, war-related disasters, public health and medical emergencies, and other occurrences requiring an emergency response.

Incident Command System (ICS) – the nationally used standardized on-scene emergency management concept specifically designed to allow its user(s) to adopt an integrated organizational structure equal to the complexity and demands of single or multiple incidents without being hindered by jurisdictional boundaries. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure, with responsibility for the management of resources to effectively accomplish stated objectives pertinent to an incident. It is used for all kinds of emergencies and is applicable to small, as well as large and complex, incidents. ICS is used by various jurisdictions and functional agencies, both public and private, to organize field-level incident management operations.

Incident Commander (IC) – the individual responsible for all incident activities, including the development of strategies and tactics and the ordering and the release of resources. The IC has overall authority and responsibility for conducting incident operations and is responsible for the management of all incident operations at the incident site.

Inter-agency Coordination – as it applies to SEMS, means the participation of various agencies and disciplines involved at any level of the SEMS organization working together in a coordinated effort to facilitate decisions for overall emergency response activities, including the sharing of critical resources and the prioritization of incidents.

Master Mutual Aid Agreement (MMAA) – Mutual Aid is provided between and among local jurisdictions and the state under the terms of the California Disaster and Civil Defense Master Mutual Aid Agreement. This agreement was developed in 1950 and has

been adopted by California's incorporated cities, all fifty-eight (58) counties, and the State. Under this agreement, cities, counties, and the State joined together to provide for a comprehensive program of voluntarily providing services, resources, and facilities to jurisdictions when local resources prove to be inadequate to cope with a given situation. The agreement states that each party agrees to furnish resources and facilities and to render services to each and every other party to combat any type of disaster. However, no party is required to unreasonably deplete its own resources, facilities, and services in the process of furnishing Mutual Aid. The mutual aid systems, current and planned, form the essential links within SEMS.

National Incident Management System (NIMS) – a comprehensive, national approach to incident management that is applicable at all jurisdictional levels and across functional disciplines. NIMS provides for a consistent nationwide template to enable all government, private-sector, and nongovernmental organizations to work together during domestic incidents. (Homeland Security Presidential Directive-5 directed the Secretary of Homeland Security to develop and administer a National Incident Management System – NIMS).

Operational Area – one of the five organizational levels in SEMS. An Operational Area consists of a county, and all political subdivisions within the county area. Operational Areas facilitate the coordination of resources between its member jurisdictions. Operational Areas also serve as a communication and coordination link between the Region and State level EOCs and local government EOCs within the Operational Area.

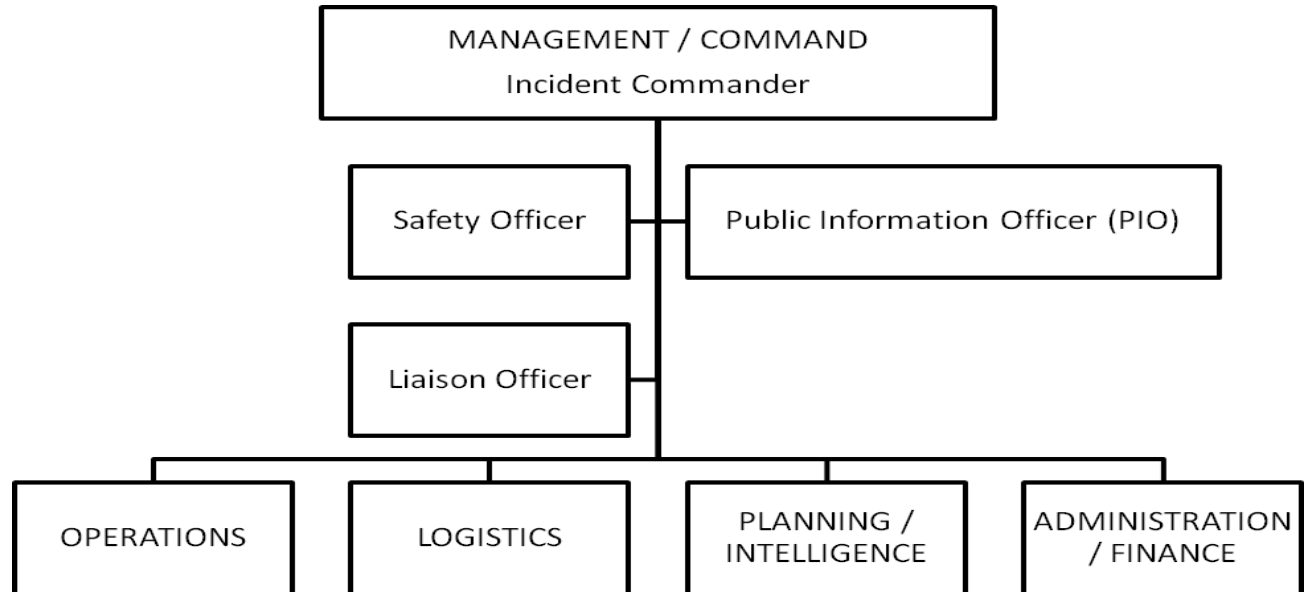

Standardized Emergency Management System (SEMS) – provides for a five-level emergency response organization, activated as needed, to provide an effective response to emergencies involving multiple agencies or jurisdictions. SEMS provides an organizational framework and guidance for operations at each level of the State's emergency management system. It provides the umbrella under which all response agencies may function in an integrated fashion. SEMS is designed to be flexible and adaptable to the varied emergencies that can occur in California, and to meet the emergency management needs of all responders.

Incident Command System (ICS)

1) ICS Structure

Within SEMS and NIMS, an emergency response organization consists of five Sections. Each one of the five functions has certain roles and responsibilities during a disaster or campus emergency. The Management Division oversees response activities in consultation with the section chiefs of the Operations; Logistics; Planning and Intelligence; and Finance and Administration. Each of these Sections, in turn, has a team or teams tasked with implementing very specific components of the District and College emergency response plan. These teams and their affiliate sections are outlined in the figure below.

Figure – Sample ICS Organizational Chart

2) BICS Command Staff Responsibilities

Management and Command — responsible for policymaking with respect to disaster planning and preparedness and for overall coordination of emergency response and recovery activities. This section has four team members, the Incident Commander, the Public Information Officer (PIO), the Safety Officer, and the Liaison Officer. During a campus emergency, the Management Team is responsible for coordinating all response activities.

Incident Commander (IC) — responsible for assessing the severity of the incident, establishing management objectives, tracking resource availability, developing and monitoring the response action plan, ensuring proper incident documentation, and assigning and releasing staff as needed.

Public Information Officer (PIO) — acts as the liaison between the school, the media, and the public. The PIO must be aware of all incident response activities and is the only person authorized to speak to the media.

Safety Officer (SO) — charged with the safety of students, staff, and others on campus during response activities. The SO has the authority to stop any response activity that would create an unsafe situation or put anyone at risk.

Liaison Officer (LO) — is the point of contact and coordination between the IC and public agencies and organizations (such as the American Red Cross, or the local utility company) working on campus in support of response activities.

3) CS General Staff (Section Chiefs)

Operations — responsible for response preparedness of Communications, Search and Rescue, First Aid, Student Release/Staff Accounting, Assembly/Shelter, and Maintenance/Fire Teams. During a disaster, this Section directs response activities of all of these teams and coordinates that response with Management and Command.

Logistics — prior to a disaster, this Section is in charge of creating a transportation plan, and ensuring that there are adequate supplies of food, water, and equipment for crisis response. During an emergency, the Section's two teams, the Supplies and Staffing Team and the Transportation Team provide services, personnel, equipment, materials, and facilities, as needed.

Planning and Intelligence — responsible for creating the action plans and checklists that will be used by all Sections during crisis response and recovery. This Section is comprised of two teams: the Situation Status Team and the Documentation Team. During an emergency, these teams gather, analyze, disseminate, and record information critical to the operation of the Management and Command section.

Finance and Administration — in charge of creating policy and procedure for documenting costs associated with emergency response. This Section has one team, called the Recordkeeping Team. During a disaster they activate contracts with vendors, keep pay records, track receipts, and account for expenditures. Their efforts make it possible for schools to reclaim costs associated with response and recovery activities from the state.

The Kern Community College District does not have a law enforcement department and is dependent on local, state, and federal responders. In most major emergencies, the District is subordinate to the designated incident commander who will be assigned by local, state, or federal responders. Only organizational Sections that are required will be activated. The size of the District and/or College Incident Command Team supporting the incident will be dictated by the size and complexity of the incident.

1) Emergencies and Incidents

General information about the emergency response and evacuation procedures for the District are publicized each year as part of the District's Clery Act compliance efforts and that information is available on the District website. All members of the campus community are notified annually that they are required to report any incident on campus that involves a significant emergency or dangerous situation that may involve an immediate or ongoing threat to the health and safety of students and employees on campus. The District must respond to and summon the necessary resources to mitigate, investigate, and document any situation that may cause a significant emergency or dangerous situation. If there is in fact a threat posed to the community, federal law requires that the institution immediately notify the campus community. Or appropriate segments of the community that may be affected by the situation.

Upon confirmation or verification by the District that a legitimate emergency or dangerous situation involving an immediate threat to the health or safety of students or employees occurring on campus, the District will determine the content of the message and will use some or all of the systems described below to communicate the threat to the campus community or to the appropriate segment of the community, if the threat is limited to a particular building or segment of the population. The District will, without delay, take into account the safety of the community, determine the content of the notification and initiate the notification system, unless issuing a notification will, in the judgment of the first responders, compromise the efforts to assist a victim or to contain, respond to, or otherwise mitigate the emergency.

Testing Emergency Response and Evacuation Procedures

An evacuation drill is coordinated by the responsible District or College officer for all facilities on campus. Students learn the locations of the emergency exits in the buildings and are provided guidance about the direction they should travel when exiting each facility for a short-term building evacuation. Students will receive information on the scene regarding the developing situation or any evacuation status changes.

Evacuation drills are monitored by the ***responsible District or College officer*** and District administration to evaluate egress and behavioral patterns. Reports are prepared by participating departments which identify deficient equipment so that repairs can be made immediately. Recommendations for improvements are also submitted to the appropriate departments/offices for consideration.

The District conducts numerous announced and unannounced drills and exercises each year and conducts follow-through activities designed for assessment and evaluation of emergency plans and capabilities. The District will publish a summary of its emergency response and evacuation procedures in conjunction with at least one drill or exercise each calendar year.

Overview

The District and/or College Incident Command Structure shall provide for the combination of facilities, equipment, personnel, procedures, and communications, operating within a common organizational structure, which is responsible for the management of resources to effectively accomplish the District and/or College stated objectives in response to an incident.

The District and Colleges' emergency response plans shall provide information on preparedness, prevention, response, recovery, and mitigation policies and procedures. The District and College emergency response plans shall also provide information on coordinating with the appropriate local, state, and federal government authorities and nongovernmental entities on comprehensive emergency management and preparedness activities.

The types of emergencies and incidents covered by the District and College emergency response plans include, but are not limited to the following:

- Adverse Weather
- Armed Gunman; Active Shooter; Hostage Situation
- Civil Disturbance
- Criminal; Violent Behavior
- Earthquakes
- Explosion; Bomb; Suspicious Package; Terrorist Threat
- Fire and Threat of Fire
- Flood
- Hazardous Material Incident
- Major Utility Failure or Power Outage (prolonged)

Action related to specific emergency or disaster incidents shall be in accordance with the District and/or College emergency response plan. Nothing in the emergency response plan shall limit the use of good judgment and common sense in dealing with matters not fully covered therein. The District and College emergency response plans shall be subordinate to local, state, or federal incident action plans during a disaster declared by those authorities.

2) Emergency Response Priorities

During an incident, emergency response priorities shall be designated as Priority One, Priority Two, or Priority Three according to the following:

- a) Priority One — Preservation of Life Safety (e.g., evacuation, medical care, shelter, etc.)
- b) Priority Two — Protection and Maintenance of Property
- c) Priority Three — Recovery and Return to Pre-emergency Operations

3) Emergency Response Levels

An emergency event or incident at the District and/or College shall be designated as a Level 1, Level 2, or Level 3 situation according to the following:

- a) Level 1 — a localized, contained incident that is quickly resolved with internal resources or limited help.

1. Emergency Level 1: Minor Emergency

This is defined as any isolated incident, which will not seriously affect the overall functional operation of the District and/or College site. These may include minor electrical failures, individual medical incidents, or a minor hazardous material spill. The District and/or College Emergency Operations Center (EOC) may not be activated. The primary response coordination is by the first responding personnel, a building emergency team member, or public safety. During an Emergency Level 1 situation, single building evacuations may occur and the involved personnel may call 9-1-1. In all cases, Public Safety shall be called for assistance and to document the incident.

- b) Level 2 — a major emergency that impacts portions of the District and/or College campus, and that may affect mission-critical functions or life safety.

1. Emergency Level 2: Major Emergency

This is defined as any on- or off-District or College site incident that could disrupt the operation of the District and/or College site. Major emergencies are typified by campus impact, including disruption of instruction or key services. These may include an uncontrolled fire, an explosion, an uncontained hazardous materials accident, an earthquake, a major utility outage or disruption, a bomb threat, and certain criminal acts or civil unrest. The District and/or College Emergency Operation Center (EOC) may be activated during Level 2 emergencies.

- c) Level 3 — an emergency that involves the entire District and/or College and surrounding community.

1. Emergency Level 3: Disaster

This is defined as any event or occurrence on- or off-District or College site that has seriously disrupted, or has the potential to seriously disrupt, District and/or College operations and functions. These may include a regional utility outage, a major earthquake, a major hazardous materials accident, community flooding, uncontrolled wildfire, or large-scale civil unrest. At this emergency level, it is anticipated the response and resource capabilities will be exceeded and overwhelmed.

4) Emergency Response Plan Evaluation

Yearly reviews of the District and College emergency response plans shall be conducted to ensure the plans are up-to-date and accurate. This review shall include legislative updates, updates of relevant operational procedures, a review of practical applications, and updates of informational materials to all Kern Community College District staff at all sites. Each year the District and College shall update telephone and fax directories, emails, personnel rosters, resource lists, and physical plant changes affecting the implementation of the Emergency Response Plan. Changes to the plan shall be made and distributed immediately

Additional Resources/Information

There are a number of additional resources that are available regarding crisis response. These include the following:

Federal Emergency Management Agency

www.fema.gov

Red Cross
